Paint support technology at a glance

Did you know...

440

tonnes of CO₂ reduced annually at one of the world's largest appliance OEM's through UniPrep® long life cleaner implementation

27

automotive OEM's in 20 countries (representing over 100 global customers) currently utilize KlearAid® as their paint overspray treatment solution

75

tonnes of sludge eliminated annually from one automotive OEM paint line with implementation of KlearAid®

Anticipating tomorrow's needs

In paint support technology (PST), we pride ourselves on being industry leaders in both innovation and sustainability. Developing today for tomorrow's needs means identifying substances of concern before regulations are established and introducing products to the market that meet industry requirements. PST also focuses on developing products that conserve natural resources such as water and energy while minimizing or eliminating waste, resulting in a more economical process. For paint pre-treatment, paint removal and paint overspray applications, PST provides a truly superior approach to the industry.

Paint pretreatment

Achieving optimal paint performance requires substrate cleaning and conversion coating to ensure superior paint adhesion and corrosion resistance. Atotech's UniPrep® and Interlox® products provide paint applicators an economical paint pretreatment capable of meeting their own performance standards while complying with environmental regulations.

Paint stripping

From rack and hooks to high value finished part reclamation, Master Remover® products are the ideal in-house paint removal solution, providing a cost effective, safe and sustainable alternative to conventional paint stripping processes.

Paint overspray treatment

The challenge of efficient paint overspray treatment becomes more complex as global emission regulations force automotive OEM and Tier 1 applicators to shift from solvent-borne to waterborne paints. With KleerAid®, a high performing, sustainable and cost effective solution is achievable.

End markets and industries Atotech serves
